gesda compass

See beyond today's application

Practical guidance informed by Science Anticipation

Brain-Computer Interfaces

What else could it enable?

A brain-computer interface designed to support attention could serve very different purposes.

At home.

Who sees the data?

At work.

Who chooses?

How a technology is used shapes who benefits, who bears the risks, and what safeguards are needed.

A clearer view of what's at stake

Plausible futures and alternative uses

Potential harms & benefits

gesda compass

Mapping to international frameworks

Evidence gaps & next steps

People & Care

Research & Innovation

Funding & Publishing

Policy & Governance

A practical tool for anticipatory governance

Compass is a web platform connecting Science Anticipation, project assessment, and international frameworks to support informed decisions.

Shape the future.
